What is life? – The Free Energy Principle and Active Inference

15/1 - 2020

Magnus T. Koudahl, Ph.D student

BIASLab, SPS group, Dept. Of Electrical Engineering

TU/e EINDHOVEN UNIVERSITY OF TECHNOLOGY

Battleplan

- Premise
- NESS and Biology
- Relation to Bayes
- Markov Blankets

- Bayesian brain hypothesis
- Free Energy Revisited
- Sample structures
- “This goes to 11!”

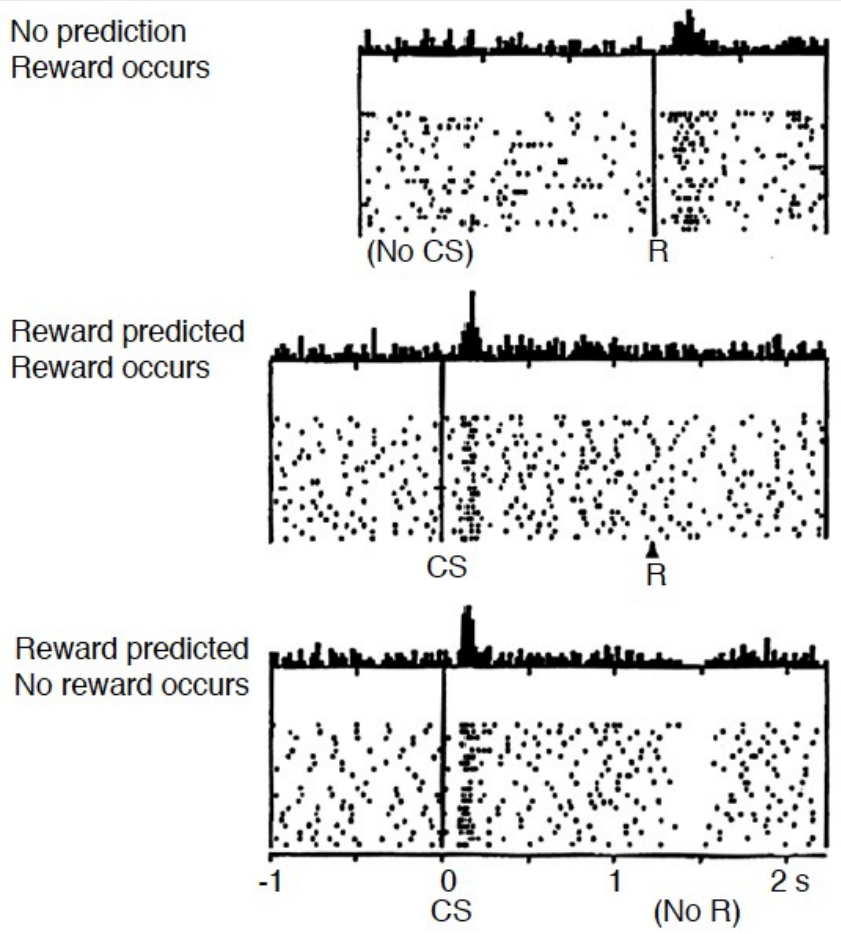
The Bayesian Brain

*“Perception is inference of the causes of observed impressions upon our sensorium!”**

**Paraphrasing Helmholtz, 1866*

Do dopamine neurons report an error in the prediction of reward? *



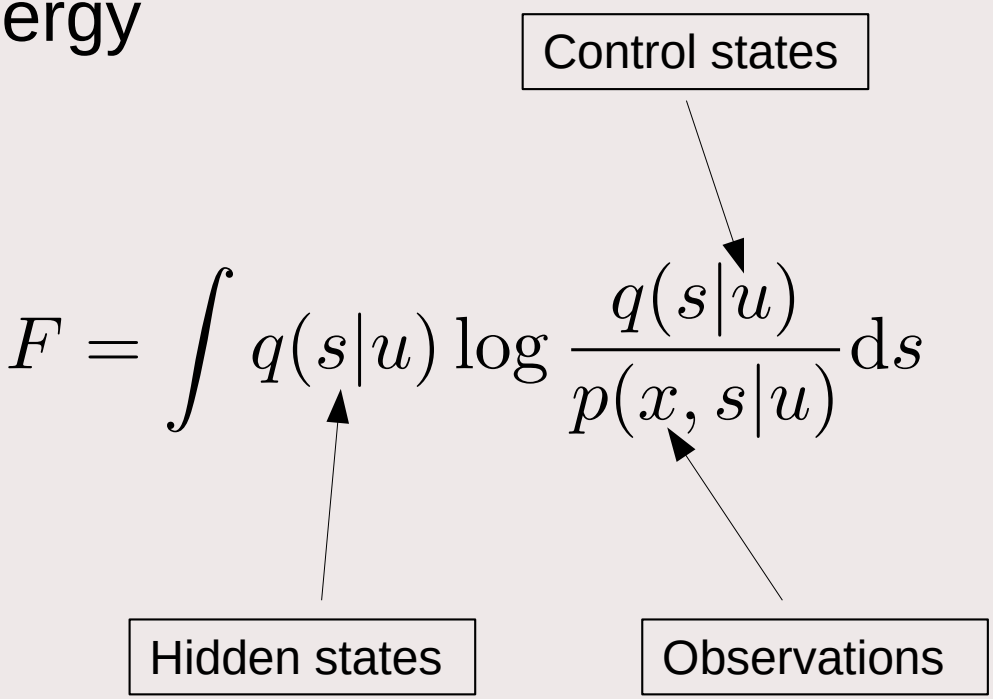
The Bayesian Brain

*Figure reproduced from Schultz, Dayan and Montague, 1997, *A Neural Substrate of Prediction and Reward*

Free Energy

$$F = \int q(s|u) \log \frac{q(s|u)}{p(x, s|u)} \mathrm{d}s$$

Free Energy

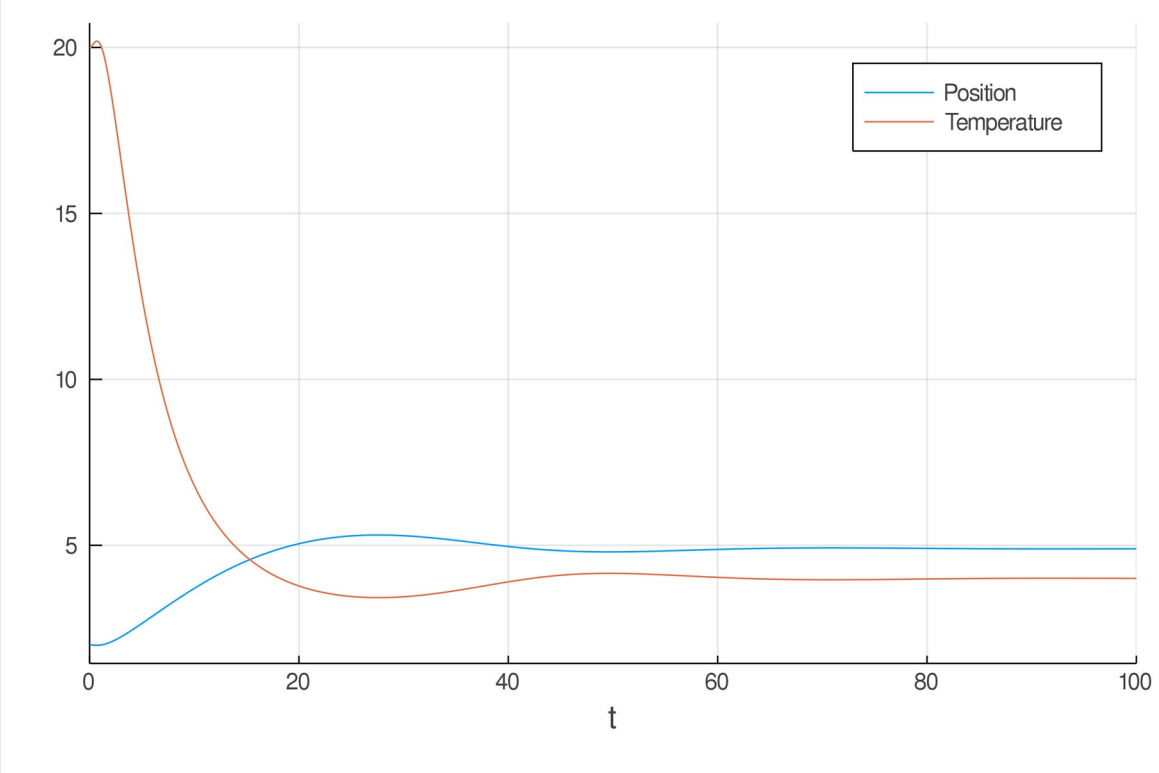


Control states
$F = \int q(s|u) \log \frac{q(s|u)}{p(x,s|u)} \mathrm{d}s$
Hidden states
Observations

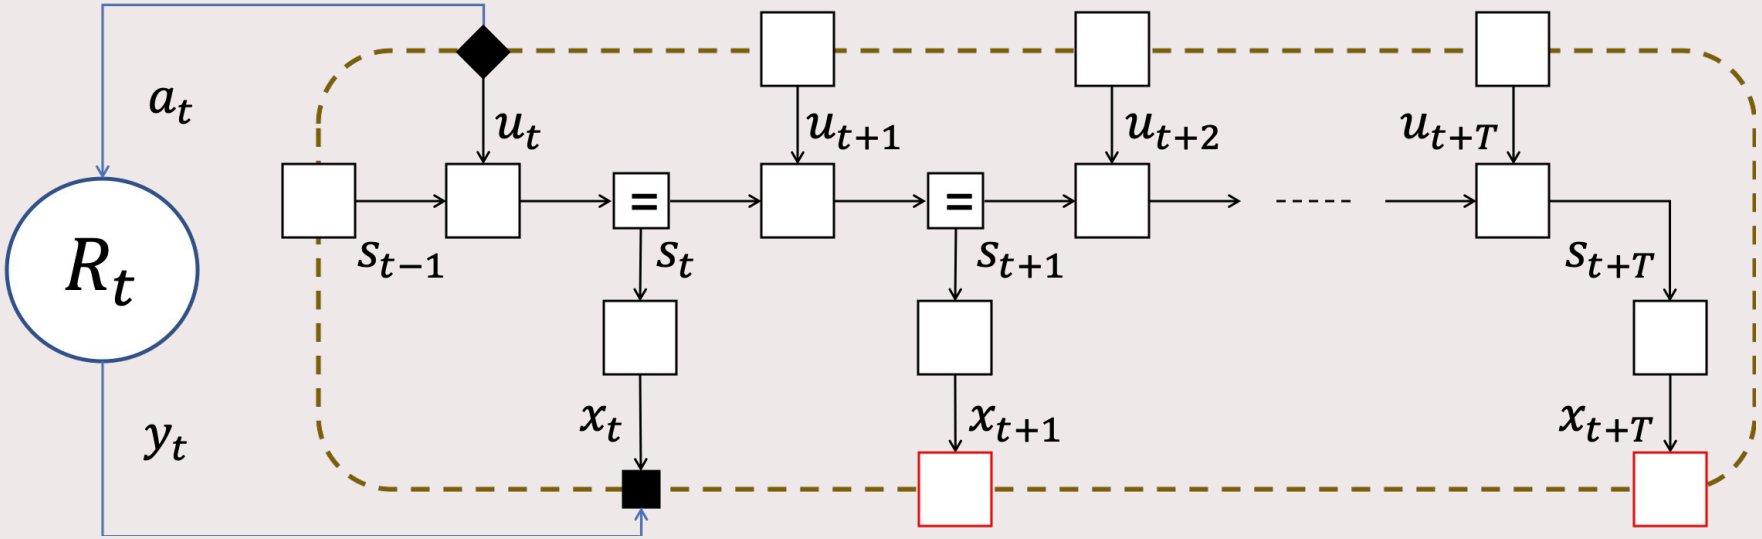
Free Energy

$$F = \int q(s|u) \underbrace{\log \frac{q(s|u)}{p(s|u)}}_{\text{Complexity}} \underbrace{- \log p(x|s)}_{\text{Accuracy}} \, \mathrm{d}s$$

Free Energy



Introducing the future



TU/e

Free Energy revisited

$$G = \underbrace{\iint q(x|s)\, \underbrace{q(s|u) \log \frac{q(s|u)}{p(x,s|u)}}_{F} \mathrm{d}s\, \mathrm{d}x}_{\text{Expectation of } F}$$

Free Energy revisited

$$G = \iint q(x|s)q(s|u)\log\frac{q(s|u)}{p(s|x,u)} - \log p(x)\mathrm{d}s\mathrm{d}x$$

Free Energy revisited

$$G = \underbrace{\iint q(x, s|u) \log \frac{q(s|u)}{p(s|x, u)} \mathrm{d}s\mathrm{d}x}_{\text{"Information Gain"}} \underbrace{- \iint q(x, s|u) \log p(x) \mathrm{d}s\mathrm{d}x}_{\text{Crossentropy}}$$

Free Energy revisited

$$G = \underbrace{\iint q(x, s|u) \log \frac{q(s|u)}{p(s|x, u)} \mathrm{d}s\mathrm{d}x}_{\text{Epistemic Value}} \underbrace{- \iint q(x, s|u) \log p(x) \mathrm{d}s\mathrm{d}x}_{\text{Instrumental Value}}$$

This one goes to 11!
